

COMPANY PROFILE

www.pwkpower.co.za

Today's industries are dependent upon competitive advantages derived from sophisticated electronics and technology equipment that rely on stable information and a stable information technology environment. Computers are used in mission-critical applications and unstable environments can cause severe disruption to business, leading to extensive financial losses in the service or trading sector.

Executive summary

BACKGROUND

To create professional and reliable power supply throughout Southern Africa and beyond its borders through the use of high-quality equipment, affordable rates and excellent craftsmanship:
To always conduct our business with complete professionalism, honesty and integrity. To respect and recognize the value of all the stakeholders of our business. To have the most ethical, trained and dedicated employees. To always ask feedback from our clients about our products and services offered.

To maximize the value for all the stakeholders of our business: To be best products and services company of choice in our industry. To make positive impact to our clients as well as our employees as this goes hand in hand with our business values. To play a significant role in the disadvantaged communities by facilitating social responsibilities. To play a pivotal role in poverty alleviation in our country through job creation and skills transfer.
